Ring Size Guide

Step 1: Measure Your Finger

Use a soft measuring tape or a piece of string. Wrap it around the base of the finger where you plan to wear the ring. Mark where the tape or string overlaps, then using a ruler measure the length in millimetres (mm).

Step 2: Find Your Ring Size

Once you have your finger measurement, select your ring size in mm on the website.

Step 3: Measure the Internal Diameter of a Ring

If you already have a ring that fits well, you can also measure its internal diameter to determine your size.

1. Use a ruler to measure across the inside of the ring (from one side to the other).
2. Record the measurement in millimetres (mm).
